

Even More Whistler Holidays from Erna Low for Season 2014-15

Further to the successful launch of their new website, [Erna Low](http://ErnaLow.co.uk), the UK's oldest and most respected independent ski tour operator, now offers skiers and snowboarders the opportunity to build their own holiday to Whistler to include flights and transfers, in addition to their market leading self-drive or accommodation only European programme.

Joanna Yellowlees-Bound, CEO of Erna Low says, "We have expanded our ski offering further for winter 2014-15 especially to Whistler in Canada, to include 12 different accommodation options, from hotels to luxury apartments, plus direct flights from London Heathrow into Vancouver.

"We also have a very special ****Exclusive offer**** - for all guests booking a Whistler holiday we will include the fabulous *Fresh Tracks* experience absolutely FREE. I was lucky enough to try [Fresh Tracks](#) where we were on the first lift up the mountain and enjoyed a delicious breakfast - it was an opportunity we will never forget."

Jane Bolton MD of Erna Low adds, "We realised that Whistler could provide the answer to many of our client's issues when booking a traditional family ski holiday. The clamp down on children being taken out during school term time means family skiers are restricted to the busy European periods such as half term and Easter. By travelling further afield, the snow season is guaranteed, the worries of 'late season skiing' are removed and additionally there are excellent English speaking ski instructors to keep young children happy. We have sourced accommodation to suit all tastes and budgets and with competitive flight rates on either British Airways or Air Canada as well as taking advantage of the excellent early booking discounts, the prices for an Erna Low holiday to Whistler can be comparable to the more popular resorts in Europe at peak times. Right now the exchange rate is also extremely good for UK skiers visiting Canada."

Whistler has 8000+ acres of terrain on the linked mountains of Whistler and Blackcomb ensuring endless skiing options for expert or novice skiers alike with a variety of green and blue runs across the resort for family skiers. There are specific family skiing "enchanted forest" runs, a castle on Blackcomb and a tree-fort on Whistler, both equipped with climbing frames and slides. Expert skiers can explore the vast off-piste terrain or even try heli-skiing.
